

Anaerobic Digestion Plant Operator

BASIC DESCRIPTION

We are looking for an enthusiastic person to join the operator team of our Anaerobic Digestion plant in Cornwall.

This is a hands-on and varied role, working within an operational biogas plant undertaking tasks including machinery operation, feedstock management, assisting with maintenance, administration and general upkeep.

JOB DESCRIPTION & KEY RESPONSIBILITIES

This position is based at the Pengelly Barton AD Plant in Leedstown and the ideal candidate will be based within a 30-minute commute of the site. You will be working alongside other operators to support the day to day running of the plant. Shifts will include working alternate weekends and some bank holidays and at times you may be required to provide holiday cover for your colleagues.

Daily responsibilities will include maintenance checks, feeding of the digester, feedstock management, record keeping and also;

- ✘ Monitoring the plant control system and responding accordingly. This will include remote monitoring.
- ✘ Operation and maintenance of the site weighbridge,
- ✘ Basic feedstock sampling and testing,
- ✘ Health & Safety implementation and compliance.

ESSENTIAL SKILLS

- ✘ Computer literate. Must be able to complete basic spreadsheets, emails and word processing documents,
- ✘ Able to work independently when required,
- ✘ Basic maintenance/mechanic skills,
- ✘ Good communicator,
- ✘ Punctual record keeping,
- ✘ Ability to plan and prioritise complex and varied tasks,
- ✘ Flexibility to work on call, on a rota system,
- ✘ Experience of operating machinery including a telehandler and forklift,
- ✘ A good working knowledge of Health & Safety,
- ✘ A good, basic understanding of AD/Biogas/Feedstock would be advantageous.

Experience of working in the AD sector is not necessary as full training will be given.

REQUIREMENTS Full UK Driving License plus Telehandler / Forklift Licenses

HOURS Negotiable – dependant on individual.

SALARY Competitive – dependant on individual.
